Business Analysis Gets Agile!

SDC 2010 will bring together some of the world's leading minds in the Agile movement, making it a key event for all those interested in Business Analysis and Agile methods.

This two day conference and one day post-conference workshop will provide practical techniques and thought-provoking ideas which you will be able to put to use right away.

"Excellent! I was impressed by the level of speakers, content, presentation skills and left with heaps of take-back-to-work ideas and techniques." Anon

The conference will:

- **Examine** the changing role of the business analyst.
- **Demonstrate** the real business value of Agile practices in these challenging times.
- **Highlight** the common pitfalls in Agile implementation and suggest ways to avoid them.
- **Generate** fresh thinking around creating successful project teams.

Remember, places are limited, so book now!

Additional Conference Highlights:

- **Optional One Day Workshop**
Leading Continuous Improvement with Agile Retrospectives
Diana Larsen, Chair, Agile Alliance and Co-Founder FutureWorks Consulting (USA)
Building on PDCA (Plan, Do, Check, Act) and other continuous improvement tools and techniques, Diana will lead an interactive workshop on how to focus and lead retrospectives for daily, incremental and milestone progress toward improving software team processes, methods, teamwork and practices. (Participants in this workshop will receive a copy of Diana's book, "Agile Retrospectives: Making Good Teams Great", newly revised for a second printing).
This workshop is not to be missed!
- **Conference Dinner**
Join us for an evening of continued networking with your peers and conference speakers in a more informal setting.
- **Package Deals**
Check out the back page for great deals and packages for SDC 2010!

Who Should Attend?

- Business Analysts
- Team Leaders
- Iteration Managers
- Scrum Masters
- Developers
- Product Owners
- Project Managers
- Senior Managers and Senior Executives

DAY ONE – MONDAY 22 MARCH 2010

9:00 - 10:10	Opening Keynote: Managing Front End Risk – It's Always a Risky Business at the Start Tim Lister Principal, The Atlantic Systems Guild (USA)	
10:10 - 10:30	REFRESHMENT BREAK	
10:30 - 11:30	When Good Agile Goes Bad: Avoiding the Common Pitfalls James King Agile Practice Lead, Software Education (Australia)	
11:30 - 12:30	What Colours are Your Backlog? Philippe Kruchten Professor of Software Engineering, University of British Columbia and Founder, Kruchten Engineering Services (Canada)	
12:30 - 1:30	LUNCH	
1:30 - 4:50	Workshop 1	Workshop 2
	Project Code Name "Blind Faith" – Software Risk Management Workshop Tim Lister Principal, The Atlantic Systems Guild (USA)	Iteration and Release Planning Philippe Kruchten Professor of Software Engineering, University of British Columbia and Founder, Kruchten Engineering Services (Canada)
4:50 - 5:50	REFRESHMENT BREAK	
6:15 - 9:30	Conference Dinner Join us for a great evening of further networking.	

DAY TWO – TUESDAY 23 MARCH 2010

9:00 - 10:10	Clarity Rules!: Six Collaboration Skills Critical to Effective, Successful Teams Diana Larsen Chair, Agile Alliance and Co-Founder FutureWorks Consulting (USA)	
10:10 - 10:30	REFRESHMENT BREAK	
10:30 - 11:30	The Vanishing Analyst James Shore Founder, Titanium IT (USA)	
11:45 - 1:00	Workshop 1	Workshop 2
	Beyond Story Cards: Agile Requirements Collaboration (Part one) James Shore Founder, Titanium IT (USA)	Creating a Climate for Project Team Success (Part one) Diana Larsen Chair, Agile Alliance and Co-Founder FutureWorks Consulting (USA)
1:00 - 2:00	LUNCH	
2:00 - 3:45	Workshop 1	Workshop 2
	Beyond Story Cards: Agile Requirements Collaboration (Part two) James Shore Founder, Titanium IT (USA)	Creating a Climate for Project Team Success (Part two) Diana Larsen Chair, Agile Alliance and Co-Founder FutureWorks Consulting (USA)
4:05 - 4:50	Where Have All The BAs Gone? Nigel Dalton General Manager of IT, Lonely Planet (Australia)	

POST-CONFERENCE WORKSHOP – WEDNESDAY 24 MARCH

9:00 - 5:00	Leading Continuous Improvement with Agile Retrospectives Diana Larsen Chair, Agile Alliance and Co-Founder FutureWorks Consulting (USA)
-------------	---

Speaker Profiles

NIGEL DALTON

(Australia)

General Manager of IT, Lonely Planet

Nigel has been a major leader in the development of award-winning digital platforms at Lonely Planet, whilst also championing an Agile transformation within the organisation.

Keynote: Where Have All The BAs Gone?

Nearly three years after Nigel Dalton took over the role of General Manager IT at Lonely Planet, Business Analysts are thin on the ground, with the majority having transformed themselves into Product Management team members. Agile practices have spread from website development to the global guidebook business, the legal team, software upgrade projects and ecommerce operations.

In this session, Nigel looks at the four main phases of change in the role of Business Analysts at Lonely Planet.

JAMES SHORE

(USA)

Titanium I.T.

A popular speaker and trainer, James is an inaugural recipient of the prestigious Gordon Pask Award for Contributions to Agile Practice from the Agile Alliance and is co-author of the book, "The Art of Agile Development".

Keynote: The Vanishing Analyst

Agile literature says next to nothing about BAs, and goes so far as to recommend eliminating requirements documentation. In this presentation, James shows how the role of the BA may change its focus in Agile projects, but continues to be as crucial as ever.

Workshop: Beyond Story Cards: Agile Requirements Collaboration

Story cards are a great tool for planning and a lousy tool for communicating requirements. In this workshop, you will learn where requirements live in Agile, how various roles fit in, where stories come from, and what happens after they're created. Join James Shore for an in-depth look at how requirements work in Agile.

DIANA LARSEN

(USA)

Chair, Agile Alliance and Co-Founder FutureWorks Consulting

Current Chair of the Agile Alliance Board of Directors and co-author of: "Agile Retrospectives: Making Good Teams Great!", Diana brings focus to the human side of organisations, teams and projects. She activates and strengthens her clients' proficiency in shaping an environment for productive teams and thriving in times of change.

Keynote: Clarity Rules! Six Collaboration Skills Critical to Effective, Successful Teams

Increase the prospect for project success by ensuring team members have the skills for effective collaboration and clear, unambiguous communication. This keynote will describe the six collaboration skills teams need and show techniques to get them active in your team.

Workshop: Creating a Climate for Project Team Success

In this interactive workshop, participants will learn how to create a work climate where Agile and traditional teams can accomplish "the job" for the organisation – delivering business value. Building on current practices, we'll explore ways to optimise four factors in the work climate: motivation, environment, support and trust.

PHILIPPE KRUCHTEN

(Canada)

Professor of Software Engineering, University of British Columbia and Founder, Kruchten Engineering Services

Philippe helps shape today's young software development talent and serves some of the world's leading organisations, including Microsoft, Alcatel, Hughes Aerospace and IBM.

Keynote: What Colours are Your backlog?

The product backlog has become a key artefact in any software development project; the point where product owner, product managers, project managers, team leaders, business analysts, developers, testers and product support meet and converge. But what do you put in your backlog to balance the needs of all these parties? What colours are your backlog and what do you do next?

Workshop: Iteration and Release Planning

Iteration planning and release planning seem very simple: you pour features in a backlog, shake, prioritise, implement and deliver. In reality, it is a tad more complicated. Here, we examine the subtle differences between (business) value and (development) cost, between user-visible features and deep down architectural features, and their dependencies. We look at technical debt and its impact on the project and examine various techniques that help project leaders plan and track iterations and releases in a chaotic environment.

TIM LISTER

(USA)

The Atlantic Systems Guild

A Principal of The Atlantic Systems Guild, author and business analysis trainer, feedback and reviews from Tim's 2008 trip were so good that you were demanding his return.

Keynote: Managing Front End Risk – It's Always a Risky Business at the Start

Requirements are 'discovered' rather than 'gathered', often influenced by politics. Managers and analysts need to recognise and court inherent risk when trying to get a project off on the right foot. Tim Lister will discuss the dominant risks associated with the early stages of a project and will offer some proven risk mitigation strategies for you to use.

Workshop: Project Code Name "Blind Faith" – Software Risk Management Workshop

This is a risk discovery and risk assessment workshop that follows on from Tim's keynote. It is open to anyone who has been on a project that was under stress, doubt and uncertainty, so Tim assumes it is open to everyone!

JAMES KING

(Australia)

Agile Practice Lead, Software Education

A highly sought-after trainer and consultant, James brings a wealth of practical business and IT experience to bear on the challenges involved in implementing Agile practices. He has provided consulting services to major corporates throughout the region and has developed a suite of leading-edge Agile training courses for Software Education and the Agile Academy in Australia.

Keynote: When Good Agile Goes Bad: Avoiding the Common Pitfalls

Agile projects are a step forward in delivering early and consistent value to the customer. But even so, there are some common issues that arise when teams implement Agile projects. While these issues are not inevitable, they are easy pitfalls for the unwary. After exploring each of the common pitfalls, James discusses potential solutions, in particular focusing on business integration, knowledge transfer and team transformation.

"Great as a reminder of what we are doing well and could do better."

P. Harper, NZQA
